Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: The instant invention is deemed to be directed to a non-obvious improvement over the inventions patented in US 4835366 and US 2561932 and US 6597863. The prior art teaches floating heaters for maintaining an opening in a body of water in freezing conditions. The improvement comprises the addition of a water pump for circulating water such that the combination of the heater and the pumped water maintain an opening in a water's surface that would otherwise freeze over with ice. The addition of the water pump to the admittedly conventional floating water heater allows the invention to maintain an opening in the surface of the water while using less heat from the heater thereby making the heater a safer and possibly reducing the cost of electricity to use the device. The available prior art does not teach the combination of both a floating or surface positioned heater and a pump means for circulating water in order to maintain a body of water free from ice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 703-306-9042. The examiner can normally be reached on Tue-Fri 5:30AM-4:00PM.
